

HEXAGON

**HxGN AgrOn Piloto Automatico Eletrico Simulador
Ti5/Ti7 Vendavel BRA ECUv4**

New Product Release - 005/2023

6th March 2023 - Rev. 1

Introduction

Aiming to release HxGN AgrOn Piloto Automatico Eletrico Simulador Ti5/Ti7 Vendavel BRA structures with *ECUv4*. These new structures can be used in place of the currents structures as the below table:

Current structure	New structure	Description
04965	08061	HxGN AgrOn Piloto Automatico Eletrico Simulador Ti7 Vendavel BRA ECUv4
05640	08062	HxGN AgrOn Piloto Automatico Eletrico Simulador Ti5 Vendavel BRA ECUv4
05733	08063	Simulador Base para Ti7 Track Controller sem Display Ti7 ECUv4
07670	08064	Simulador Base para Ti5 Track Controller sem Display Ti5 ECUv4
07671	07882	Kit Complemento Piloto Eletrico para Simulador ECUv4

Both structures can be marketed, depending on the ECU available. The difference between the structures is the ECU (version 3 or 4).

For these new structures created the cables used on the current structures are the same.

Installation

The installation is the same for both versions.

Software compatibility

The software of the ECUv3 and ECUv4 are different. The ECU bootloader and Ti firmware update manages this update automatically.

Creation date: 06/03/2023

Revision date: 06/03/2023
