3. IDENTIFICATION OF AFFECTED PRODUCT

For example, the image below shows the location of the label on an ECUv4 unit.

4. REASON FOR CHANGE

The new label was introduced to simplify the identification process and avoid confusion between the previous ECUv3 and the current ECUv4 versions, improving efficiency and accuracy in the maintenance and repair of the units

5. IMPACTS OF THE CHANGE

The introduction of the new label will enable users to quickly and easily distinguish between ECUv3 and ECUv4 versions, reducing the risk of errors and delays in maintenance and repair activities, ultimately improving the reliability and performance of the units.

6. PROPOSED FIRST SHIP DATE: Q1/2023

The Proposed First Ship Date is the forecasted date that a customer may expect to receive the changed products. Both versions can be mixed until the old stock ends.
