2. DETAILED CHANGE INFORMATION

We would like to inform you of a recent change regarding the structures that previously featured the Display Ti7+ with integrated Wi-Fi. Due to the End-of-Life (EOL003/2023) of the Display Ti7+ models equipped with integrated Wi-Fi, we have made necessary adjustments to ensure continued functionality.

The structures will now be equipped with the new Display Ti7 model, which does not include integrated Wi-Fi functionality. Furthermore, the structures will now come with a Wi-Fi adapter that can be conveniently plugged into the USB port of the Display Ti7, integrating this functionality.

By incorporating the Wi-Fi adapter, we have ensured that the structures maintain the desired wireless connectivity without compromising on functionality or performance.

3. IDENTIFICATION OF AFFECTED PRODUCT

This change can be identified by the absence of a Wi-Fi connector on the Display Ti7+, as well as the addition of the new Wi-Fi adapter included with the structure.

4. REASON FOR CHANGE

This change was implemented as a result of the strategic decision made by the company, driven by the End-of-Life (EOL) of the displays.

5. IMPACTS OF THE CHANGE

While utilizing the Wi-Fi feature with the Ti7+ Display and Wi-Fi adapter, it is important to note that the USB port will be occupied and unavailable for other purposes. Nevertheless, Wi-Fi connectivity will remain a prominent feature of the Ti7+ Display in conjunction with the Wi-Fi adapter.

6. PROPOSED FIST SHIP DATE: Q3/2023

The initial batch of the modified structures will be promptly delivered.
