**PRODUCT AFFECTED** 05140

**NEW PART NUMBER (if applicable)** 07912

**TYPE OF CHANGE**  MAJOR  MINOR  OBSOLESCENCE

**CHANGE AFFECTS**  FORM  FIT  FUNCTION

RELIABILITY  OTHER

#### 2. DETAILED CHANGE INFORMATION

New Electronic Controller Unit – ECU *HxGN AgrOn ECU Piloto Automatico Eletrico v4.x JACTO* (07912) was created. This new ECU has a different pinout from the current ECU (*05140 - HxGN AgrOn ECU Piloto Automatico Eletrico v3.3.X JACTO*), but for HxGN AgrOn Electric Auto Steering JACTO the cable used in both versions are the same.

Current ECU	New ECU	Description
05140	07912	HxGN AgrOn ECU Piloto Automatico Eletrico v4.x JACTO

All ECUs (current and new) will be marketed at the same time, depending on the ECU available.

#### 3. IDENTIFICATION OF AFFECTED PRODUCT

The structures can be identified by the part number codes.

#### **4. REASON FOR CHANGE**

The global shortage of some components has made unfeasible the assembly of the current ECU (05140) in quantity enough to supply our demand. For this reason, Hexagon decided to use the new ECU (07912) to guarantee the supply for all customers without impairing the delivery time.

#### **5. IMPACTS OF THE CHANGE**

Two versions of the same product (with different ECU) will be available, and this must be managed by Hexagon and JACTO.

#### **6. PROPOSED FIRST SHIP DATE: Q1/2023**

The Proposed First Ship Date is the forecasted date that a customer may expect to receive the changed products. Both versions can be mixed until the old stock ends.

#### **7. MORE INFORMATION**

For more information, please contact your Hexagon Agriculture sales/technical support person.
