2. DETAILED CHANGE INFORMATION

New HxGN AgrOn Bait Control structures for after-market were created with the Electronic Controller Unit – ECU *HxGN AgrOn ECU Controle de Isca de Formiga v4.x* (07924). This new ECU has a different pinout from the current ECU (*06267 - HxGN AgrOn ECU Controle de Isca de Formiga v3.X*), so the cable may not be compatible.

The new structures created already have included all cables and items for the Bait Control. The following table shows the structures created and their respective current structure.

Current Structure	New Structure	Description
06266	07938	HxGN AgrOn Controle de Isca de Formiga ECUv4

All structures (current and new) will be marketed at the same time, depending on the ECU available.

3. IDENTIFICATION OF AFFECTED PRODUCT

The structures can be identified by the part number codes.

4. REASON FOR CHANGE

The global shortage of some components has made unfeasible the assembly of the current ECU (06267) in quantity enough to supply our demand. For this reason, Hexagon decided to use the new ECU (07924) to guarantee the supply for all customers without impairing the delivery time.

5. IMPACTS OF THE CHANGE

Two versions of the same product (with different ECU) will be available, and this must be managed by Hexagon.

6. PROPOSED FIRST SHIP DATE: Q1/2023

The Proposed First Ship Date is the forecasted date that a customer may expect to receive the changed products. Both versions can be mixed until the old stock ends.
